EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with R. Neil Sudol on April 15, 2004.

The application has been amended as follows:

Claim 1, lines 4 and 5, deleted phrase: "at least approximate"

Claim 10, line 3, deleted word: "effectively"

Claim 10, line 4, deleted word: "substantially"

The marked up version of the claim amendment follows:

1. A method for improving cardiac function, comprising:
inserting a compressive device into a patient in a region including the patient's heart;
and after the inserting of said compressive device into the patient, operating said compressive device to bring opposite walls of only one ventricle of the patient's heart into [at least approximate] contact with one another to thereby constrict and close off a lower portion of said one ventricle of the patient's heart.

10. A method for improving cardiac function comprising:
inserting a tensile member into a patient; and

Art Unit: 3743

deploying said tensile member in the patient's heart so as to [effectively] constrict and [substantially] close off a lower or apical portion only of only a left ventricle of the patient's heart, thereby reducing the volume of the left ventricle and only the left ventricle of the patient's heart.

Election/Restrictions

2. Claims 1, 10 and 18 are generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 4, 5, 6, 9, 12, 15, and 21, are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Thus, claims 1-21 are allowed.

3. The following is an examiner's statement of reasons for allowance: the prior art of record does not show, singly or in combination, the combination of elements recited in claims 1, 10, and/or 18, including inserting a compressive device into a region near the heart and inserting the device to bring the opposite walls of only one ventricle into contact, thus closing off the lower portion of one ventricle.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
